

### **REMARKS**

Claims 1-9 remain in the application for consideration of the Examiner.

Reconsideration and withdrawal of the outstanding rejections and objections are respectfully requested in light of the above amendments and following remarks.

Turning now to the art rejections, Claims 1, 2, and 7-9 were rejected under 35 U.S.C. § 102 as being anticipated by Meyer.

Meyer does not disclose or suggest the presently claimed invention including the step of determining a compensation power equivalent to said power variance to a heater for increasing temperature device, the compensation power being based on delivery voltage, delivery current and resistance of said heater.

Meyers fails to disclose determining a compensation power based on the delivery voltage, delivery current and resistance of the heater.

Applicants appreciate the indication that if Claims 3-6 were rewritten in independent form including the limitations of the base claim and any intervening claims, these claims would be allowable.

By the instant amendment, Claims 3 and 4 have been placed in independent form including the limitations of the base claim.

In light of the above, it is respectfully submitted that the present application is in condition for allowance, and notice to that effect is respectfully requested.

While it is believed that the instant response places the application in condition for allowance, should the Examiner have any further comments or suggestions, it is

respectfully requested that the Examiner contact the undersigned in order to expeditiously resolve any outstanding issues.

To the extent necessary, Applicant petitions for an Extension of Time under 37 CFR 1.136. Please charge any fees in connection with the filing of this paper, including extension of time fees, to the deposit account of Texas Instruments Incorporated, Account No. 20-0668.

Respectfully submitted,

W. Daniel Swayze, Jr.  
Attorney for Applicant  
Reg. No. 34,478
